

Nguyễn Anh Quốc

WEB DEVELOPER

Kien Giang City | quocna.work@gmail.com | 0329 555 190 | Nguyễn Anh Quốc | Việt Nam

PROFESSIONAL SUMMARY

Fullstack Web Developer with experience building enterprise systems including RBAC, real-time data synchronization, and activity logging systems. Skilled in React.js, Node.js, and modern web technologies, with a strong focus on performance and scalable architecture.

SKILLS

- **Frontend:** React.js, Next.js, Ant Design, TailwindCSS
- **Mobile:** React Native, Expo
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL, PostgreSQL, SQL Server
- **Authentication & Security:** JWT, RBAC
- **Realtime Communication:** Socket.io
- **Tools & Services:** Git, GitHub, Postman, Firebase
- **Languages:** JavaScript, TypeScript

EDUCATION

Graduated from FPT University

Major: Software Engineering

HONORS & AWARDS

09/2023 - 11/2023

- Certificate of Merit – Honorable Student of the Semester

PROJECTS

Artifact Management System (Main Project)

05/01/2025 - 05/03/2025

Live Demo: <https://www.quan-ly-hien-vat.online/>

Back-end: https://github.com/AnhQuoc2903/Back_End_Cong_Ty

Front-end: https://github.com/AnhQuoc2903/Font_End_Cong_Ty

Team size: 1 (Fullstack Developer)

- Developed a full-featured artifact management system for enterprise-level usage
- Implemented JWT authentication with refresh token and RBAC permission system
- Built artifact and inventory management with Cloudinary image upload
- Designed dashboard with real-time statistics and low stock alerts
- Developed activity log system with Excel export and change tracking
- Integrated Socket.io for real-time updates across users
- Designed scalable MongoDB schema and RESTful APIs
- Developed responsive UI with React, Ant Design and TailwindCSS

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Ant Design, TailwindCSS

Gaga Oto Management System

05/04/2025 - 07/6/2025

Mobile: <https://github.com/AnhQuoc2903/GagaOto-Mobile>

Back-end: <https://github.com/AnhQuoc2903/GagaOto-BackEnd>

Front-end: <https://github.com/AnhQuoc2903/GagaOto-FondEnd>

Team size: 1 (Fullstack Developer)

- Developed a fullstack garage management system for vehicle repair and maintenance operations
- Built responsive admin dashboard using React.js, TypeScript, and Ant Design
- Designed RESTful APIs with Node.js, Express.js, and MongoDB
- Implemented JWT authentication, refresh token flow, and RBAC authorization system
- Developed inventory & import invoice management with stock tracking and audit logs
- Built quotation, work order, payment, and repair history management modules

- Integrated Cloudinary image upload and vehicle/work-order image management
- Implemented automated maintenance reminder system using cron jobs
- Developed low-stock alerts and real-time inventory updates
- Optimized API handling with Axios interceptors and automatic token refresh
- Built reusable UI components and modular frontend architecture

Tech Stack: React.js, React Native, Expo, TypeScript, Node.js, Express.js, MongoDB, Ant Design, Cloudinary

Smart Building CMMS System

09/010/2025 - 10/3/2026

Back-end: https://github.com/AnhQuoc2903/CMMS_BACKEND

Front-end: https://github.com/AnhQuoc2903/CMMS_FRONTEND

Team size: 1 (Fullstack Developer)

- Developed a fullstack CMMS (Computerized Maintenance Management System) for smart building operations
- Built asset management, preventive maintenance, and work order management modules
- Implemented multi-role RBAC system for Super Admin, Building Manager, Supervisor, and Technician roles
- Developed SLA tracking and technician performance analytics dashboard
- Built preventive maintenance scheduling with automated work-order generation
- Implemented tenant request approval workflow and audit logging system
- Developed real-time notification system using Socket.io
- Built asset downtime tracking and maintenance history analytics
- Integrated Cloudinary image upload and digital signature management
- Developed responsive admin dashboard using React.js and Ant Design
- Built RESTful APIs with JWT authentication and role-based authorization

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, RBAC, Ant Design, Cloudinary

WORK EXPERIENCE

Fullstack Developer

Meta Art Company

 07/2025 – Present

Responsibilities:

- Developed fullstack systems using Node.js, React.js, TypeScript, JavaScript
- Designed and built artifact management system (CMMS-like) for enterprise usage
- Developed additional modules such as blog system and content management
- Designed and optimized databases using MongoDB, MySQL, PostgreSQL
- Built RESTful APIs and integrated frontend with backend services
- Deployed applications on Render and Vercel
- Optimized system performance and improved scalability

Frontend Developer

Nam Phuong So Company (Airline software solutions)

 11/2024 – 06/2025

Responsibilities:

- Developed and maintained web interfaces using React.js & TypeScript
- Integrated frontend with backend APIs (RESTful APIs)
- Built reusable components and optimized UI performance
- Worked on internal systems for airline operations
- Ensured responsive design and improved user experience

Frontend Developer Intern

UTA Company

 05/2023 – 08/2023

Responsibilities:

- Designed and developed UI using React.js, HTML, CSS, JavaScript
- Integrated frontend with backend APIs (RESTful APIs)
- Built responsive layouts and reusable components
- Collaborated with team to deliver frontend features
